**Core CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

## PROJECTS

**Campus Connect — Campus Management System | MERN Stack** **Jan 2026 – Present**

*Live Demo: campus-connect-problem-resolver.vercel.app*

- Engineered a hierarchical campus management system, implementing JWT for secure role-based access control (Student, Admin, Super Admin).
- Designed a secure broadcasting module allowing administrators to publish targeted announcements with document attachments, improving communication speed.

**Sky Builder — AI-Powered Resume Generator | MERN, Generative AI** **Jan 2026**

*Live Demo: sky-builder-ai-resume.vercel.app*

- Architected an AI-driven resume generator utilizing the Groq API (LLaMA 3.1) to create dynamic, ATS-optimized content based on user inputs.
- Built a responsive frontend using React, Tailwind CSS, and Vite, while managing PDF exports and automated workflows via Python and Node.js.

**CityCare — Civic Issue Reporting Platform | MERN Stack** **Oct 2025**

*Live Demo: citycarepseudocoders.vercel.app*

- Developed a civic issue reporting platform featuring location-based mapping and image upload functionalities to streamline community complaint submissions.
- Implemented REST APIs with Node.js and Express for user registration, real-time ticket tracking, and status updates within a 4-person Agile team.
